## PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience building responsive, interactive web applications with JavaScript, React, HTML and CSS. Experienced in component-based development, React Router, Context API, REST API integration, state management, reusable UI components and responsive design. Built and deployed practical projects including an e-commerce application and responsive websites. Strong problem-solving skills, attention to detail, and a commitment to writing maintainable, user-focused code.

## TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React, JSX, Responsive Web Design

React: React Router, Context API, useState, useEffect, Reusable Components

APIs & Data: REST APIs, Fetch API, JSON, API integration, localStorage

Tools: Git, GitHub, VS Code, Vite, Chrome DevTools

Deployment: Vercel, Netlify

Additional: Performance awareness, SEO fundamentals, UI implementation, debugging

## PROJECTS

**E-Commerce Web Application | React |** React, JavaScript, React Router, Context API, REST API, CSS

- Built a responsive e-commerce interface with product collections, category navigation and search.
- Implemented cart and wishlist functionality using React Context API and reusable components.
- Integrated a REST product API and handled loading, error and product-state flows.
- Implemented quantity management, product details and checkout flow, with responsive layouts for different screen sizes.

**Responsive Interior Design Website |** HTML, CSS, JavaScript, Responsive Design

- Designed and developed a responsive business website focused on clear visual hierarchy and user-friendly navigation.
- Implemented responsive layouts and polished UI interactions for desktop and mobile users.
- Deployed the project for public access and portfolio presentation.

**Weather Application |** JavaScript, HTML, CSS, REST API

- Built a weather application that consumes an external weather API and presents location-based weather information.
- Practiced asynchronous JavaScript, API requests, DOM updates and error handling.

**JavaScript Calculator |** JavaScript, HTML, CSS

- Developed a functional calculator with a clean responsive interface and interactive controls.
- Applied JavaScript event handling, state-like UI updates and input validation.

## EDUCATION

**Gregory University Uturu** — B.Sc. Mass Communication (2021 – 2025)

## PROFESSIONAL DEVELOPMENT

- Hands-on development with modern JavaScript and React through practical web application projects.

## ADDITIONAL INFORMATION

- Open to junior/entry-level frontend developer roles, internships and remote opportunities.
- Available for collaborative development, code review, debugging and continuous technical learning.
